EXPERIENCE

Novitech, Full Stack Development Intern - Completed intensive training in modern web development technologies and software engineering practices. - Worked on frontend development using React, JavaScript, HTML, and CSS. - Gained exposure to backend integration, database operations, and application deployment workflows. - Strengthened understanding of full-stack application architecture and development lifecycle processes.	11/2025 – Present Online
---	-----------------------------

EDUCATION

Bachelor of Engineering (B.E.) - Computer Science and Engineering, <i>Government College of Engineering, Tirunelveli, Tamil Nadu</i> - CGPA: 8.4 / 10.0 - Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Operating Systems, Computer Networks, Artificial Intelligence, Software Engineering, Web Development	2024 – 2028
---	-------------

TECHNICAL SKILLS

Programming Languages: C, Java, Python, JavaScript, PHP | **Mobile Development:** Flutter, React Native |
Frontend Technologies: HTML, CSS, React | **Databases:** MySQL, Oracle, Firebase, Supabase | **Tools & Platforms:** Git, GitHub, Edge Impulse, Expo Go | **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Computer Networks, Full Stack Development, Machine Learning, IoT

CERTIFICATIONS

Full Stack Development Course - Web Development | React Development Training | Frontend Web Development Fundamentals

PROJECTS

LanShare - Cross-Platform File Sharing Application, Flutter, Dart, TCP Sockets, SHA-256 - Architected a cross-platform file sharing solution supporting Android-to-Android, PC-to-PC, and cross-device transfers over local networks. - Established reliable peer-to-peer communication using TCP socket programming. - Incorporated SHA-256 based file verification to ensure transfer integrity and consistency. - Designed automated device discovery, transfer monitoring, and connection management workflows.
Bond - Real-Time Messaging Application, Flutter, Firebase - Created a real-time communication platform with user authentication and instant messaging capabilities. - Leveraged Firebase services for data synchronization and backend management. - Structured reusable UI components to maintain consistency across application screens. - Delivered a responsive mobile experience optimized for day-to-day communication.
College Voting Web Application, PHP, MySQL, JavaScript - Developed a digital voting platform to streamline election management within academic environments. - Introduced authentication and vote validation mechanisms to maintain election integrity. - Managed candidate and voting records through a MySQL-backed administrative system. - Provided dedicated interfaces for both administrators and voters.
Sound Recognition & Categorization Models, Python, Edge Impulse, Kaggle Datasets - Trained machine learning models for audio classification and sound recognition tasks. - Performed dataset preparation, model evaluation, and performance analysis. - Utilized Edge Impulse for model training and deployment workflows. - Explored embedded AI applications for real-time audio processing.
Gesture Controlled Car, IoT, Embedded Systems - Designed a gesture-driven robotic vehicle using sensor-based input mechanisms. - Translated hand movements into navigation commands through embedded control logic. - Integrated wireless communication for remote operation.
Voice and Joystick Controlled Wheelchair, IoT, Embedded Systems - Developed an assistive mobility prototype supporting both voice and joystick controls. - Combined multiple control methods to improve accessibility and usability. - Implemented efficient command processing for movement and navigation.

ACHIEVEMENTS

- Secured First Place in the 3LC Data-Centric AI Hackathon with a model score of 0.96790.
- Participated in multiple 24-hour hackathons centered on Artificial Intelligence and Software Development.
- Solved 88+ coding problems on LeetCode, strengthening algorithmic thinking and problem-solving abilities.
- Independently delivered projects across networking, mobile development, machine learning, and embedded systems domains.

CODING PROFILE

LeetCode

- Solved 88+ coding problems.
- Regularly practice Data Structures and Algorithms.
- Worked extensively with Arrays, Strings, Binary Search, Dynamic Programming, Trees, Hash Tables, and Backtracking.

EXTRACURRICULAR ACTIVITIES

- Active participant in hackathons, coding contests, and technical competitions.
- Continuously expanding expertise in software engineering, artificial intelligence, networking, and mobile application development.
- Engage in hands-on project development to strengthen practical problem-solving and engineering skills.
